

Setup Guide for SQL Express 2019

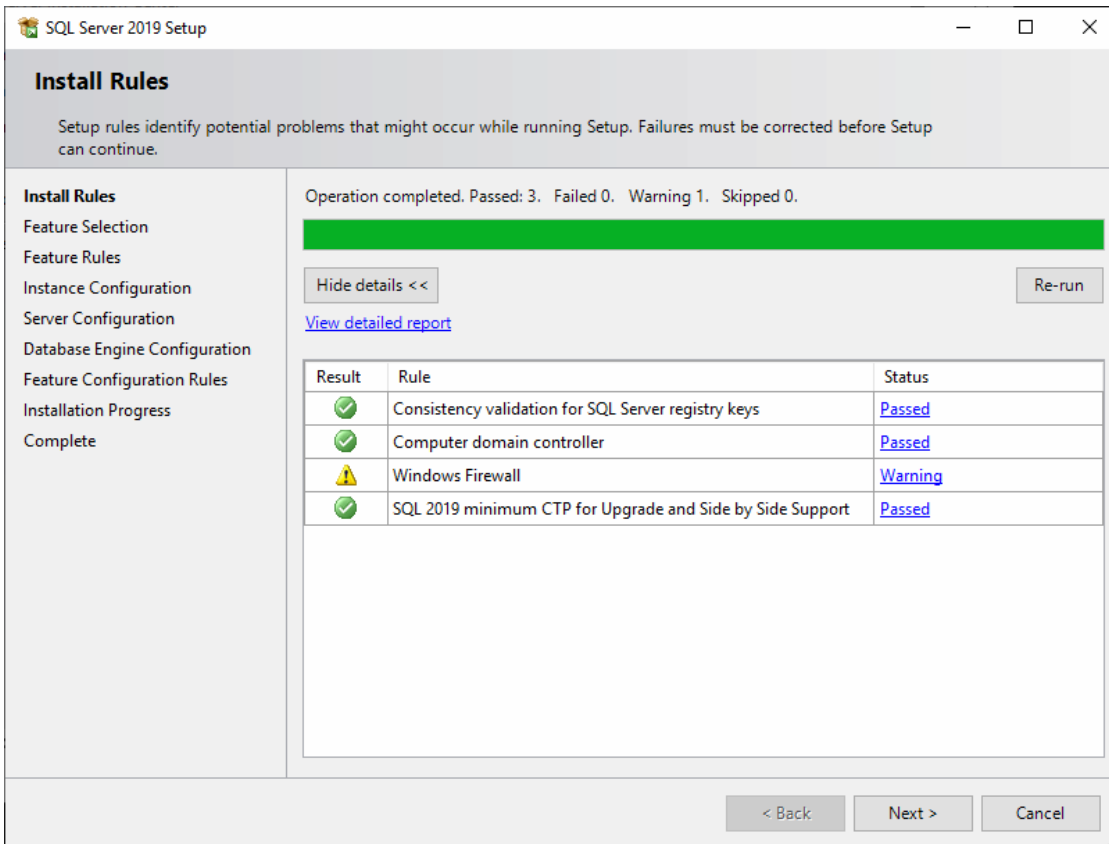

1. Choose 'New SQL Server...'

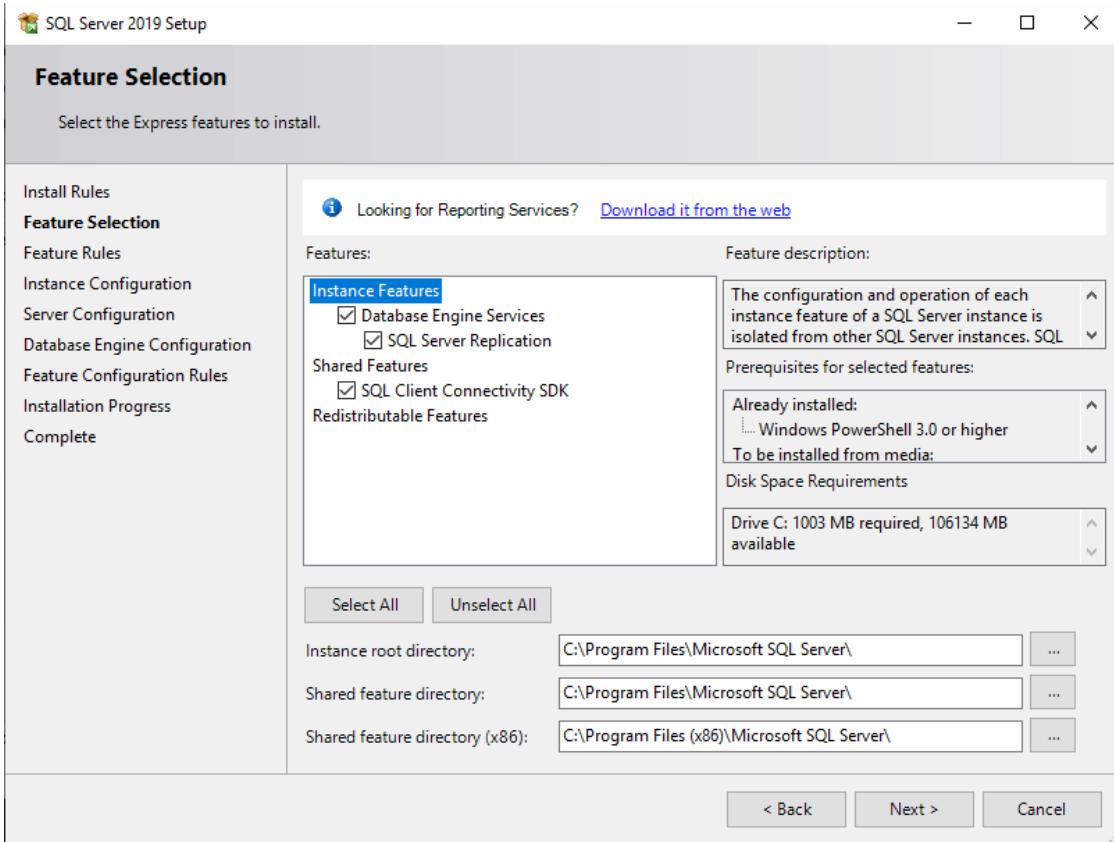

2. Check 'Accept License Terms...'

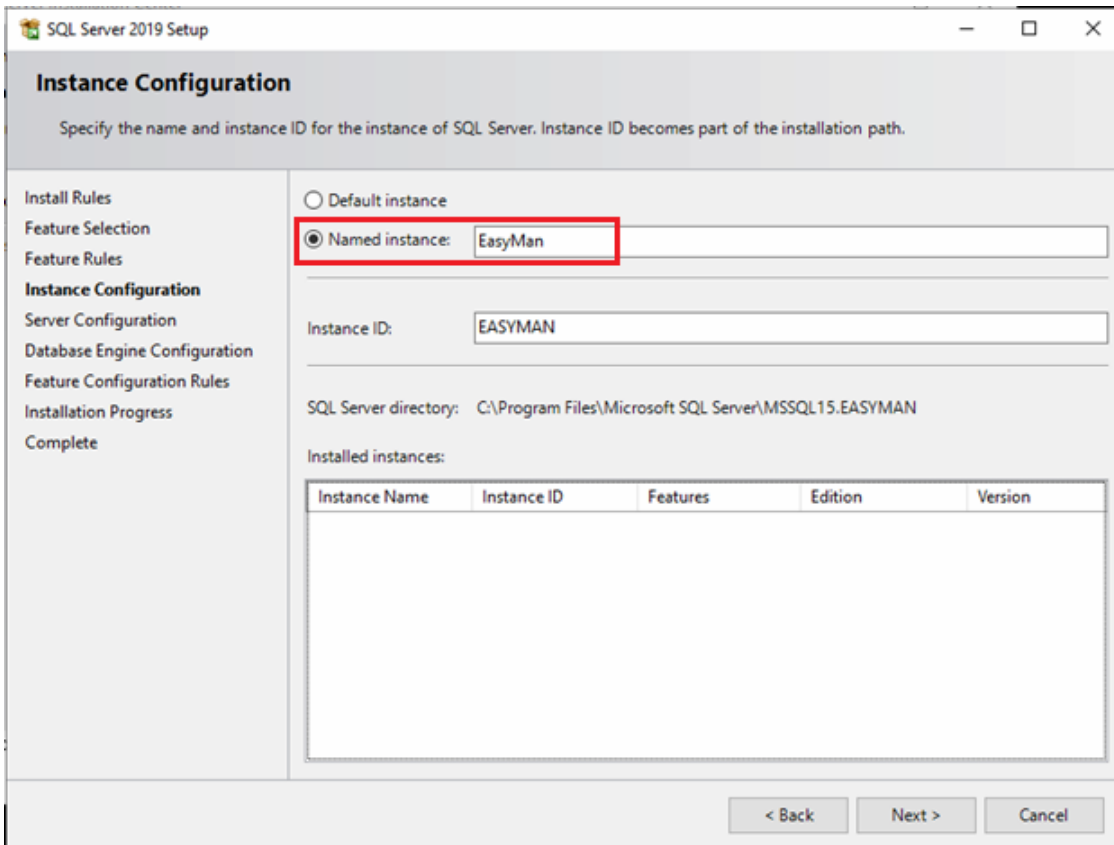

3. Skip Microsoft Update and click 'Next'

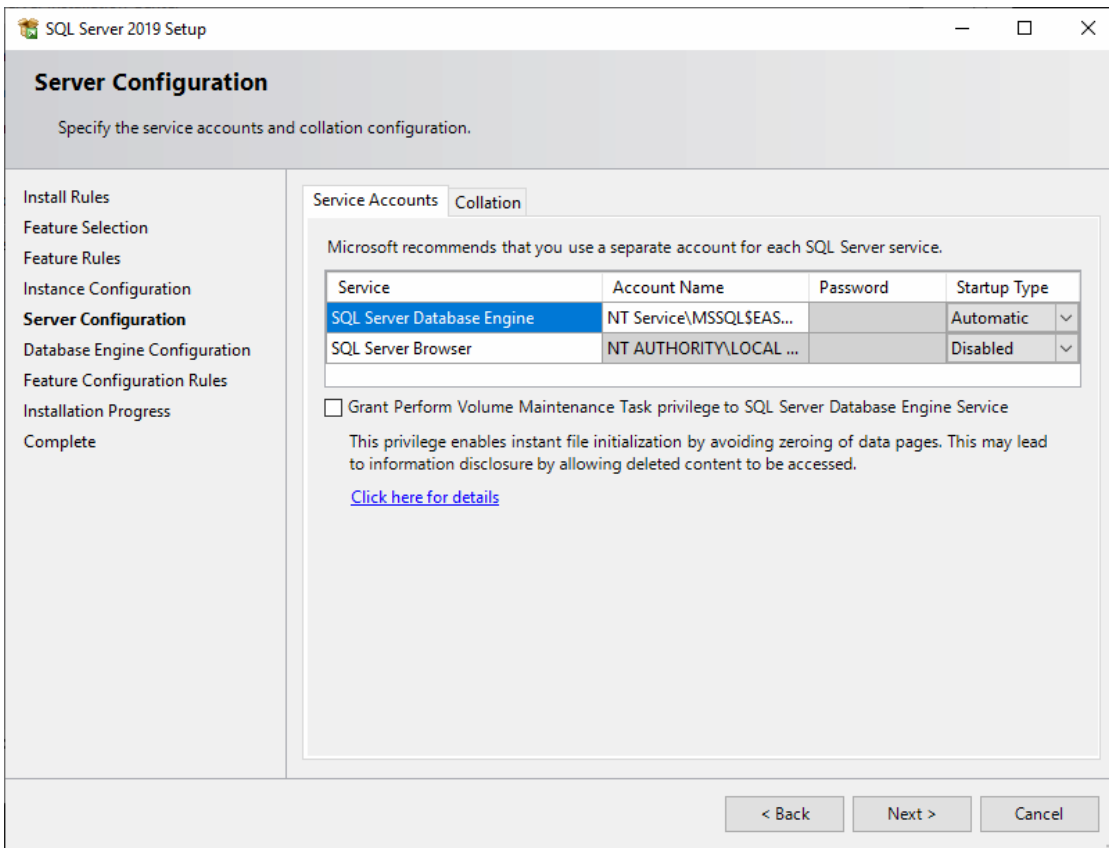

4. Default and click 'Next' (windows firewall will be fixed later)

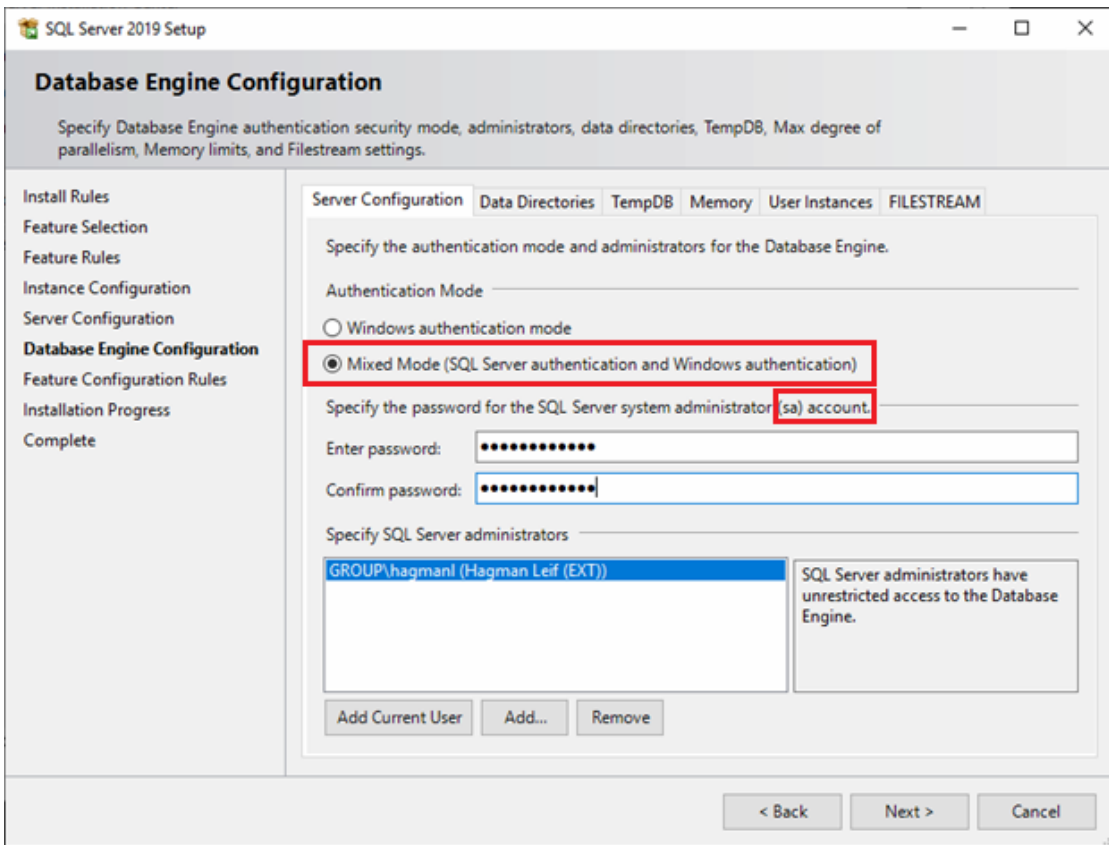

5. Use Default and click 'Next'

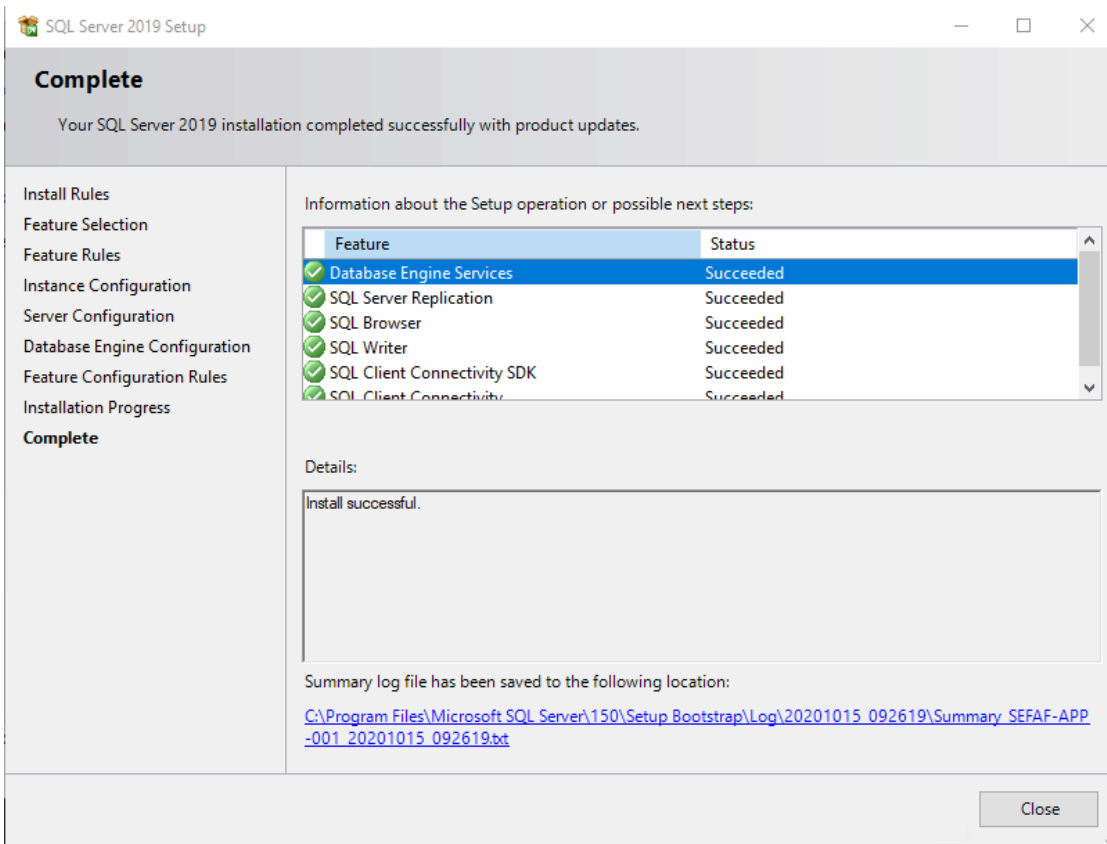

6. Change Named instance to 'EasyMan' and click 'Next'

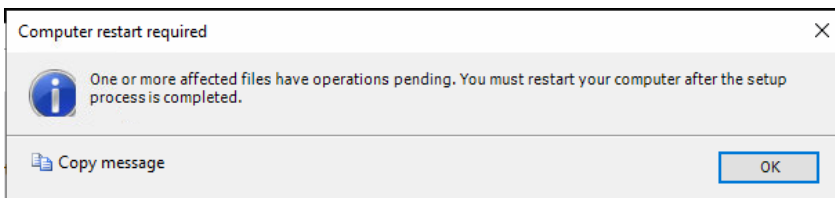

7. Use Default settings and click 'Next'

8. Change to 'Mixed Mode', enter a password and click 'Next'
Note: write down the password. You need it when you install Easy Man.

9. The installation is now complete. Close all windows.

A restart request may occur in some cases.
